

Dear Scanning Systems

I would like to give my impression of your system Profit Track after almost 12 months operation in our service station.

We became aware of Profit Track at a Service Station Seminar in Dubbo, at the time we were experiencing some troubles with our existing system, mainly due to age and the fact no one had contacted us with any upgrade or new system alternative.

From the first demonstration via computer hook-up, the ease of operation, range of information at hand and the crisp design of the overall system had us waiting in anticipation.

I can say that from a Management point of view, the reports available at your finger tips is a must for any person managing their business today.

In fact, we have a interested purchaser of our business and I was able to produce reports on financials, stock and sales immediately. Each report is easy to understand, information in some reports can be tailored to incorporate information relative to your own operation.

The POS system is also easy and informative to both the operator and customer. Sales information is displayed for the customer, including advertising of specials available in store.

I believe that Profit Track is the system for now and tomorrow, system updates and electronic news mailings keep everyone informed.

Keep up the good work.

Regards,

Murray and Glenys
